CAT

Petroleum Power Solutions

Warren CAT® is an authorized Caterpillar® dealer for land-based and offshore petroleum markets. Warren has a rich heritage combining over 40 years of experience using Caterpillar gas and diesel engines as the prime movers for mechanical and electrical power packages. As one of the largest Cat® power systems dealers in the world, Warren CAT offers capabilities and resources unmatched by other dealers. By combining the strengths of market knowledge, production capabilities, rental resources, and Cat's worldwide support network, Warren CAT sets itself apart from other power system suppliers in the global market. Industry leaders count on Warren CAT for the highest quality in petroleum power solutions.

Warren CAT serves the following petroleum business segments from conception to commissioning, and beyond, by providing technical support and service after the sale.

LAND DRILLING

- 600V SCR / AC Rig Generator Set Power Ratings up to 1,500 KW
- 480V Generator Sets for Mechanical Rig Auxiliary Loads and Complete Camp Power Packages with Enclosures up to 545 KW
- Diesel engines for Drawworks and Pump drives up to 900 BHP
- Completely Enclosed Master Skid Fabrication and Assembly
- Single Source for Complete Generator through Radiator Packages

Oklahoma City Packaging Facility - Generator Staging Area

Magnolia Garden Banks Tension - Leg Platform

OFFSHORE AND EXTREME ENVIRONMENT DRILLING AND PRODUCTION

- Specification-Driven, Custom-Designed Generator Sets, Controls and Switchgear
- Auxiliary and Completely Self-Contained “Black-Start” Emergency Packages with Marine Society and 3rd Party Approvals, i.e.: ABS, USCG, UL, FM, CSA
- Hazardous Area Application Approvals: Class I / Division 2, Zone 2, ATEX
- Experience Includes Generator Set Power for SPAR/TLP/FPSO Facilities
- Extreme Environment Generator Set Power Ratings up to 5,000 KW

3512C Diesel Generator Set for a Domestic SCR Land Drilling Rig

3516B Diesel generator set for an International SCR Land Drilling Rig from our Midland PSD location

Arctic 3512B Diesel Generator Set - Eastern Russian Federation, fabricated out of Midland PSD

Gas 3616 Compression Engine

GAS COMPRESSION

- Full-Line of Caterpillar Gas Compression Engine Families and Ratings
- State-of-the-Art Cat Gas Engine Ignition and Control Technologies
- One-Stop Gas Engine Source for Compressor OEMs and Operators
- Compression Engine Power Ratings up to 4,700 BHP

C15 Diesel Engine with a TH-35 Drop-Box Transmission

WELL SERVICING

- Caterpillar-Recognized, Well Service Excellence Dealership, Sales and Service
- Total Retrofit and Repower for Transmission through Radiator Packages
- Well-Stimulation FRAC Engine Power Ratings up to 2,500 BHP
- Well Servicing and Pulling Unit Engine Power Ratings up to 595 BHP

Oklahoma City Packaging Facility
Master Skid Fabrication Area

Load-Out of a 50-ton Emergency Offshore
1000 KW Generator Set

Production

Warren CAT specializes in onshore, marine, desert and arctic environments by providing comprehensive solutions associated with power demand; including electronic controls, switchgear, structural steel tanks, acoustic/weather/fire protective enclosures, and EPA/IMO exhaust emissions regulatory compliance. Whether the application calls for a natural gas or a diesel engine, Warren CAT is committed to exceeding customer expectations.

- Full Fabrication and Packaging Facilities in both Midland, Texas and Oklahoma City, Oklahoma
- Facilities Utilize *Lean Manufacturing* Methodology and Practices
- Both Locations Include Multiple-Bay Shops with Overhead Crane Coverage
- Heated Paint Booths at each Location with On-Site Sandblasting
- 30,000+ Square Feet of Dedicated Indoor Petroleum Fabrication/Packaging Space and 25+ Acres of Yard Space for Storage and Multiple-Unit Testing
- Welding Processes Utilized: FCAW, GMAW, and SMAW, per ANSI/AWS D1.1
- Total Factory Acceptance and Load Testing Capable with Full Witness Access

Rental Power

One call connects you with Warren Rental Services large fleet of power generation, temperature control, and compressed air equipment --designed and built exclusively for rental applications. Equipment can be on its way in minutes and online when you need it. You'll get fast, no-hassle service and complete 24 hours support at terms attractive to your bottom line.

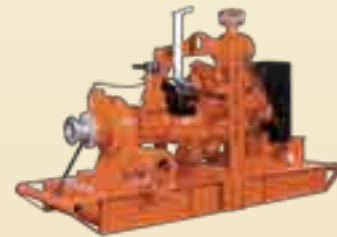

• Cat Generators

Cat equipment is sound attenuated, self-contained, and easily transportable. Designed for quick connection and fast, reliable service. Generator sets available from 20kW to 2000MW power modules with utility-grade switchgear. Ancillary equipment available for your power needs includes cable, distribution gear, transformers, load banks and fuel tanks. All equipment is EPA certified.

• Warren Light Towers

Warren light towers are designed to meet your portable lighting solutions and to prepare you for any situation; Available in three styles: 6kw Narrow Body, 6kw Wide Body, and 20 kW Wide Body.

The light towers are designed for easy towing, handling, and operating capabilities. We build the towers in our facilities; therefore every step of our manufacturing process has been developed to meet our highest quality standards.

• Pumps

We offer the widest range of rental pumps in the industry. Choices range from 4" 750gpm Hi & Low Pressure to 6" 1700gpm Hi & Low Pressure. The automatic-priming centrifugal pumps provide superior pumping capability in both speed and lift.

• Compressors

Sullair compressor packages provide reliable, clean dry compressed air. Spiral-drive and rotary screw compressors powered by Cat engines or high-efficiency motors deliver low-cost air at almost any flow and pressure for the ultimate flexibility.

Compressor packages are designed for total reliability and ease of service. Air compression output from 185-1600 cfm; 100-350 psi and 30, 60 & 90lb. breakers.

• Temperature Control

Cat temperature-control equipment includes mobile air conditioners to 90 tons, air-cooled liquid chillers to 450 tons, brine chillers for freezers and sensitive processes. Designed for fast delivery and quick connection.

Contact your nearest Warren Rental Services location the next time you need on the spot power.

Product Support

Warren CAT has the capability to respond quickly to your service needs backed by Cat's worldwide support network. Our team of engineers, electricians, and service technicians are ready to give you turnkey support. Complete system design, delivery, installation and operations. We take care of the equipment so you can focus on your business.

Tulsa Engine Rebuild Center

SERVICE

Warren CAT provides complete product support with 24/7/365 domestic and international field service coverage and extensive shop repair capabilities.

- Caterpillar factory-trained personnel for electrical and mechanical service
- Over 150 Power Systems Engine/Generator Technicians
- 40+ fully-equipped field service units
- Major engine overhaul and rebuild facilities located in Texas and Oklahoma

ENGINEERING & DESIGN

Warren CAT utilizes a team of dedicated and experienced engineers to provide interpretation of highly-technical specifications, innovative designs, as well as, construction support for the entire life cycle of petroleum power projects.

CAT® GLOBAL DEALER NETWORK

Warren CAT is a proud member of the Cat Global Dealer Network which provides access to the industry's most technologically advanced service and field application solutions.

COMPREHENSIVE SOLUTIONS

Warren CAT provides a full range of ancillary comprehensive solutions for your power needs. They include:

Insurance

Cat® Insurance offers specialized, affordable coverage to help companies protect against unexpected costs arising from covered physical damages or loss of equipment. From Physical Damage insurance to Extended Coverage beyond the standard warranty period, you can count on Cat Insurance to help you manage your business risk.

Payment Options

Pay for your service and rentals with Cat AccessAccount, a cardless revolving charge that gives you one itemized statement and lets you track purchases and pay through a secure-web based system.

Power Finance

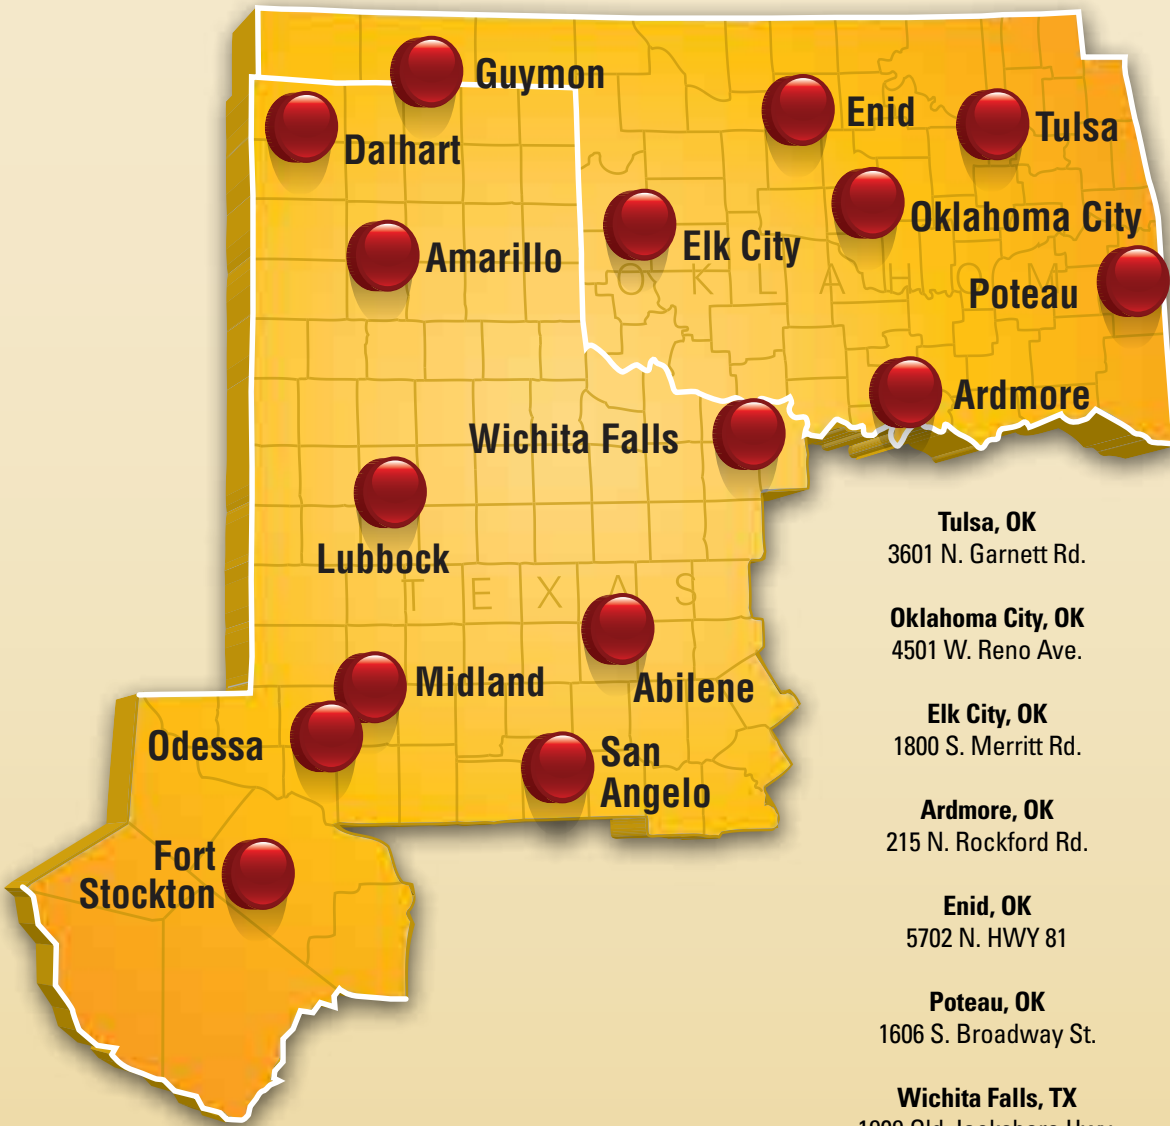

Caterpillar Power Finance is a worldwide organization that creates innovative solutions to support the sale of Caterpillar power generation products. Financing is available for Cat electric power generation, oil and gas equipment, and cogeneration systems, as well as OEM equipment powered by Cat engines. You can finance your Cat equipment or the entire turnkey project, including the soft costs of engineering and installation.

Work with the team that understands your business, your industry, and how to put capital to work.
