WARREN

CAT

WE SET HIGH STANDARDS TO MEET YOUR HIGH EXPECTATIONS.

Returning a machine, power train, engine, hydraulic system or key component to like-new condition is an extensive process that requires trained professionals, specialized equipment, stringent quality control and access to the latest engineering updates. Warren CAT is capable of performing all levels of Cat® Certified Rebuilds, and no matter where you go in the world, you'll find the work completed to a consistent standard of excellence.

BENEFITS OF REBUILD OPTIONS

All major components are dyno tested.

Every rebuild is performed by certified technicians.

Every rebuild uses the Cat criteria to meet reusability and salvage guidelines.

Updates can be applied to a Certified Rebuild to improve productivity.

Rebuilds are a fraction of the cost of a new machine purchase.

Machine productivity is improved with greater uptime and lower owning and operating costs.

Extended Equipment Protection Plan (EPP) coverage is available to protect your machine, power train, hydraulic or machine component rebuild.

Every Cat Certified Rebuild includes a like-new warranty on all replaced parts.

CHOOSING CAT EQUIPMENT WAS A SMART INVESTMENT. NOW, MAKE THE MOST OF IT.

When you choose Caterpillar, you get equipment and components that are built to perform not for one lifetime, but for multiple lifetimes. Don't let that extra value go to waste. Take advantage of the Cat Certified Rebuild program and return your end-of-life machines, systems and components to like-new condition at a fraction of the cost of buying new.

CHOOSE THE CAT CERTIFIED REBUILD PROGRAM OPTION THAT BEST FITS YOUR EQUIPMENT AND BUSINESS NEEDS.

CMR: Certified Machine Rebuild

Returns your entire machine to good-as-new condition—or better-than-new condition with upgrades and enhancements.

CPT / CPT+: Certified Power Train

Restores power train components bringing them back to new life.

CHR / CHR+: Certified Hydraulic Rebuild

Restores like-new performance to your excavator's hydraulic system.

CMCR: Certified Machine Component Rebuild

Certain machine components such as the captive engine, transmission and torque converter, axles, differentials or final drives.
